From experts on working with court-mandated populations, this book shows how motivational interviewing (MI) can help offenders move beyond resistance or superficial compliance and achieve meaningful behavior change. Using this evidence-based approach promotes successful rehabilitation and reentry by drawing on clients' values, goals, and strengths--not simply telling them what to do. The authors clearly describe the core techniques of MI and bring them to life with examples and sample dialogues from a range of criminal justice and forensic settings. Of crucial importance, the book addresses MI implementation in real-world offender service systems, including practical strategies for overcoming obstacles. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers.

Wake Up in Your Dreams and Live a Happier, More Lucid Life A lucid dream is a dream in which you become aware that you're dreaming. It's a powerful opportunity to solve problems, create new possibilities, take charge of your own healing, and explore the depths of reality. This book provides a range of practical techniques and activities to help you bring the creativity and super-conscious awareness of lucid dreaming into your life. Join international expert Clare R. Johnson as she shares the most up-to-date lucid dreaming techniques on how to get and stay lucid, guide dreams, resolve nightmares, deepen creativity, and integrate dream wisdom into everyday life. Drawing on cutting-edge science and psychology, this book is packed with inspiring stories of life-changing lucid dreams and fascinating insights into topics such as the ethics of dream sex, how to interact with lucid dream figures, and the nature of consciousness. Whether you're a person who barely remembers your dreams or a lifelong lucid dreamer, this in-depth guide is the perfect next step as you cultivate the power of lucid dreaming. Praise: "Dr. Clare Johnson has energetically led the way in revealing the limitless practical and spiritual potential of lucid dreaming, so far-reaching it can change the world. Her clearly-written book is destined to become essential reading for all those interested in lucid dreaming. It points out the essential phenomena of lucid dreaming, and then amazes us by opening its extraordinary major vistas to us, that reveal the true glory and limitless potential of our inner universe. This is a significant book."—Dr. Keith Hearne, the scientist who provided the world's first proof of lucid dreaming in 1975, and inventor of the world's first Dream Machine

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Not many of us get a chance to share their teaching-learning experiences with others. Here I am, sharing my experiences by focusing on a fact, that, students we teach are on transit; they eventually leave schools and proceed with their lives in their respective communities. Our social and pedagogical obligation as educators is to teach them skills to use after exiting educational institutions, that is, helping them gain community skills. The development of community skills starts with an understanding that communities and schools interlink. That is, learners who go to school expect to use the knowledge they gain to serve their communities. This calls for a broader vision of learning that goes beyond the four walls of classrooms. It is an ideology that persuades educators to produce graduates with apposite levels of academic achievements as well as broad community skills like ability to think, be responsible, make decision and solve problems. Everyone, almost every day, uses these skills. Educators thus are pressed to think of ways to knit together learning and community's aspirations. This can be done by engaging learners in activities that help build their community skills. Every educator teaches these skills, consciously and unconsciously. This resource contributes some ideas and processes that can enhance educators' role of imparting community development skills.

This third edition of The Art of Communication (previously titled Creating Communication) is a brief and practical introduction to speech communication. Emphasizing face-to-face communication, yet also addressing the role of technology and its influence on daily communication, Fujishin helps you develop greater understanding of how important communication skills are in your personal and professional life—and will inspire you to use these skills in ways that enlarge and improve the lives of others as well as your own. Fujishin employs a distinctively encouraging and conversational approach as he explains the basic communication skills necessary to improve in numerous contexts—including public speaking, small group, interpersonal, intercultural, leadership, interviewing, and technology-based communication. The result is an easy-to-read book that provides the tools to implement powerful changes in the ways you interact with others.
