'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Heaven lays down the law, and Hell gets more hellish as the greatest shared universe of all time makes its malevolent return.

Trek is David Carsons first graphic design book in 5 years. It is the most comprehensive collection of his work since The End of Print published in the mid 90s and documents his travels to address young people in lectures and workshops around the world. Due to the huge success of his first book and the magazines he has directed hehas become the most sought after speaker in the field. His graphic talent evolves permanently and in his other vocation,teaching, his skill is legend. Carson has inspired an entire gen eration of design and art school students across the globe. Trek features excerpts from the highly successful Marshall McLuhan Project, plus work created for high-profile clients such as Nine Inch Nails and Quicksilver. David is based in South Carolina and Malibu. He works as author, music video and commercial director, advertising and magazine designer, consultant, lecturer and teacher.

Perfect to entertain kids over the Easter break, this pocket-sized coloring book is filled with decorative eggs, spring flowers, fluffy bunnies, chicks and other cute animals. With a pretty foiled cover, I Heart Easter is sure to be an egg-citing gift.

Reteaching Workbook

For more than 100 years, Aston Martin has created some of the most beautiful - and powerful - cars ever seen on road and track. Here, the experts at evo magazine look back at its glorious history, with first-hand, behind-the-wheel reports, technical information and performance stats. From the earliest surviving models to the latest machines, the greatest Astons of all time are tried and tested, accompanied by jaw-dropping photography from the world-renowned evo photographers. Special features explore the stories behind the famous James Bond cars, from Goldfinger DB5 to Spectre DB10, as well as the story of Aston on track, from early racing prototypes to Le Mans glory. An in-depth study of a motoring icon, evo: Aston Martin is a roll call of motoring excellence and a must-have for all petrolheads.

Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.
