The story of the company that was founded by the inventor of the snowmobile In 1942, Joseph-Armand Bombardier invented the snowmobile and founded his company to manufacture them. From its humble beginnings as an entrepreneurial company in rural Quebec, led by an enterprising inventor, Bombardier Inc. has emerged as a global leader in the transportation industry. This book tells the fascinating tale of this remarkably well managed

This book explains how to
take surreptitious
photographs and record video
of people and property in a
safe and effective manner
while producing excellent
results. It is the most
comprehensive text on

available. It takes the
reader through conventional
as well as the most

sophisticated clandestine
photography methods in
practice today, and it
covers the use of all types
of equipment ranging from
off-the-shelf to the most
high-tech equipment
available. The ultra-long-
range night vision
photography methods
discussed in this book were
devised by the authors and
only exist here. Readers
will discover esoteric
techniques for
photographically recording
recognizable human and
vehicle plate images from
distances of over a mile in

both daylight and night conditions. Myriad methods for secretly photographing people and property under diverse and difficult conditions are presented. Readers will discover innovative applications of combinations of old and new photographic-related technologies—some combined in unexpected ways that produce surprising results. It is written and extremely well illustrated in an easy to understand style for all photographers regardless of skill level. The book is appropriate for anyone in law enforcement, military operations, and private investigation. It will also

From dirt bikes and jet skis
to weed wackers and
snowblowers, machines
powered by small gas engines
have become a permanent—and
loud—fixture in American
culture. But fifty years of
high-speed fun and pristine
lawns have not come without
cost. In the first
comprehensive history of the
small-bore engine and the
technology it powers, Paul
R. Josephson explores the
political, environmental,

and public health issues surrounding one of America's most dangerous pastimes.

Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in

encouraging responsible
operation. Synthesizing
information from medical
journals, recent
environmental research,
nongovernmental
organizations, and
manufacturers, Josephson's
compelling history leads to
one irrefutable conclusion:
these machines cannot be
operated without loss of
life and loss of habitat.
