FOX Racing Shox and your bike manufacturer have teamed up to deliver a FLOAT R shock that has the perfect ProPedal tune for your bicycle's rear suspension design. Your FLOAT R is delivered to your bike manufacturer in one of three settings: FIRM, MEDIUM, and LIGHT. The setting of your FLOAT R is listed on the band at the bottom of the air sleeve and is denoted by an icon, as shown on the ...

The connoisseur's guide to the typewriter, entertaining and practical What do thousands of kids, makers, poets, artists, steampunks, hipsters, activists, and musicians have in common? They love typewriters—the magical, mechanical contraptions that are enjoying a surprising second life in the 21st century, striking a blow for self-reliance, privacy, and coherence against dependency, surveillance, and disintegration. The Typewriter Revolution documents the movement and provides practical advice on how to choose a typewriter, how to care for it, and what to do with it—from National Novel Writing Month to letter-writing socials, from type-ins to typewritten blogs, from custom-painted typewriters to typewriter tattoos. It celebrates the unique quality of everything typewriter, fully-illustrated with vintage photographs, postcards, manuals, and more.

National Bestseller Most women don't want to hear about breast cancer unless they have it and need to make some decisions, but these days news about breast cancer—the number one killer of women ages twenty to fifty-nine—is everywhere. Hope for a cure abounds. Celebrities have come forward to share their experiences and raise awareness. Chances are you know someone who has had it. But did you know that you make choices every day that bring you closer to breast cancer—or move you farther away? That in the majority of cases, cancer isn't up to fate, and there are ways to reduce your risk factors? That many of the things you've heard regarding the causes of breast cancer are flat-out false? There have been few solid guidelines on how to improve your breast health, lower your risk of getting cancer, optimize your outcomes if you're faced with a diagnosis, and make informed medical choices after treatment. Until now. “Dr. Funk writes *Breasts: The Owner's Manual* just like she talks: with conviction, passion, and a laser focus on you.” —DR. MEHMET OZ, Host of The Dr. Oz Show “*Breasts: The Owner's Manual* will become an indispensable and valued guide for women looking to optimize health and minimize breast illness.” —DEBU TRIPATHY, MD, Professor and Chair, Department of Breast Medical Oncology, University of Texas MD Anderson Cancer Center “*Breasts: The Owner's Manual* not only provides a clear path to breast health, but a road that leads straight to your healthiest self. As someone who has faced breast cancer, I suggest you follow it.” —ROBIN ROBERTS, Coanchor, Good Morning America

Electronic Noses and Olfaction 2000 reflects the state of progress toward the development and application of electronic instruments called electronic noses (e-noses). These instruments are generally based on arrays of sensors for volatile chemicals with broadly tuned selectivity, coupled to appropriate pattern recognition systems. They are capable

Consumers of American media find themselves in a news world that has shifted toward more conservative reporting. This book takes a measured, historical view of the shift, addressing factors that include the greater skill with which conservatives have used the media, the media's gradual trend toward conservatism, the role of religion, and the effects of media conglomeration. The book makes the case that the media have managed to not only enable today's conservative resurgence but also ignore, largely, the consequences of that change for the American people.

Inspired by the leading authority in the field, the Centre for Process Systems Engineering at Imperial College London, this book includes theoretical developments, algorithms, methodologies and tools in

process systems engineering and applications from the chemical, energy, molecular, biomedical and other areas. It spans a whole range of length scales seen in manufacturing industries, from molecular and nanoscale phenomena to enterprise-wide optimization and control. As such, this will appeal to a broad readership, since the topic applies not only to all technical processes but also due to the interdisciplinary expertise required to solve the challenge. The ultimate reference work for years to come.

High communication efforts and poor problem solving results due to restricted overview are two central issues in collaborative problem solving. This work addresses these issues by introducing the processes of agent melting and agent splitting that enable individual problem solving agents to continually and autonomously reconfigure and adapt themselves to the particular problem to be solved. The author provides a sound theoretical foundation of collaborative problem solving itself and introduces various new design concepts and techniques to improve its quality and efficiency, such as the multi-phase agreement finding protocol for external problem solving, the composable belief-desire-intention agent architecture, and the distribution-aware constraint specification architecture for internal problem solving. The practical relevance and applicability of the concepts and techniques provided are demonstrated by using medical appointment scheduling as a case study.
