Building on the tremendous success of their best-selling Economics, Brue, McConnell, and Flynn have revised their one-semester approach in Essentials of Economics, 3e to provide a fresh alternative for the survey course. The result is a patient, substantive treatment of micro and macro topics appropriate for the introductory economics student, and fully integrated in the digital environment to provide instant remediation and feedback through McGraw-Hill's innovative assessment tool Connect Plus Economics. McGraw-Hill's adaptive learning component, LearnSmart, provides assignable modules that help students master core concepts in the course.

Connect Master: Economics provides a revolutionary, digital-first approach for the principles of economics course that is ideal for a variety of course formats—traditional, online, flipped, or hybrid. Authors Carlos Asarta and Roger Butters offer the same core content covered in mainstream textbooks, but in a way that breaks free from the constraints of a traditional textbook's structure and format—empowering instructors to take advantage of new approaches in teaching methodology to revitalize their course and improve student engagement and outcomes. Instead of lengthy, narrative-driven chapters, content in Connect Master is organized into over 250 topics, each anchored by an engaging 2-4 minute professionally-produced video and supported by a host of dynamic learning resources such as interactive graphs, worked examples, helpful hints, and robust assessment content. Topics are delivered to students through the most advanced adaptive learning technology on the market, using continual assessment and artificial intelligence to personalize the experience for each individual student. The result is an immersive experience that is flexible, innovative, and aligned to how today's students learn and obtain information.

Built to focus on what matters to students in today's high-tech, globalized world, Dean Karlan and Jonathan Morduch's Economics represents a new generation of products, optimized for digital delivery and available with best-in-class adaptive study resources in Mc-Graw Hill Connect. The second edition delivers core economic concepts along with exciting new ideas in economic thought and strives to keep students engaged by confronting issues that are important in the world. This text combines a familiar curriculum with material from new research and applied areas such as finance, behavioral economics, and the political economy. Students and faculty will find content that breaks down barriers between what takes place in the classroom and what happens in our nation and broader world, with applications that are driven by empirical evidence, data, and research. Karlan and Morduch show students that economics is a tool to better one's own life and promote better public and business policies in the world. At the same time, this second edition challenges students to reach their own conclusions about what "better" really means.

McConnell/Brue/Flynn has long set the standard for providing high-quality content to instructors and students alike. The 21st edition continues to benefit from author Sean Flynn's influence with new discussions on strategic behavior, game theory, unconventional monetary policy and interest rate normalization. A robust set of content designed to facilitate classroom engagement through peer instruction has been developed to align with the learning objectives in the text. New innovations like interactive graphs and videos combine with SmartBook's adaptive reading experience and even more algorithmic and graphing assessment content in Connect to help students succeed in the course. McConnell/Brue/Flynn is expertly tailored to support a variety of course formats, institutions, and students. Its depth of content and breadth of resources continue to be unparalleled in the introductory market.
