"Are You Experienced?" is the title song for the Jimi Hendrix Experience 1967 debut album. It has been described as one of Jimi Hendrix's most original compositions on the album by music writer and biographer Keith Shadwick. The song is largely based on one chord and has a drone-like quality reminiscent of Indian classical music. It features recorded guitar and drum parts that are played backwards and a repeating piano octave. Live recordings from 1968 are included on The Jimi Hendrix Concerts a

The Jimi Hendrix Experience had one of the most dazzling and sensational careers of any band. Their roller-coaster ride through a schedule of sell-out tours and frantic recording sessions left them crazed with sex, drugs, stardom, and exhaustion; but at the same time they produced some of the most explosive, inventive, and inspired music ever heard. Now, for the first time, Experience bassist Noel Redding tells the whole story. He lucidly and wittily describes the making of the band's startlingly innovative music; how their phenomenal stage act, featuring Hendrix playing with his teeth and setting his guitar on fire, engendered a state of mass hysteria in the audience; and the scarring aftermath of legal hassles and corporate duplicity. Frank, funny, rich in anecdotes, and full of insights into Hendrix, his genius, and the way it has been exploited, Are You Experienced? is a no-holds-barred account of an unforgettable band and a musical legend.

Rich is fifteen and plays guitar. When his girlfriend asks him to perform at protest rally, he jumps at the chance. Unfortunately, the police show up, and so does Rich's dad. He's in big trouble. Again. To make matters worse, this happens near the anniversary of his uncle's death from a drug overdose years ago. Rich's dad always gets depressed this time of year, but whenever Rich asks questions about his late uncle, his dad shuts down. Frustrated by his dad's silence, Rich sneaks into his office and breaks into a locked cabinet that holds his dad's prized possession: an electric guitar signed by Jimi Hendrix. Before he knows it, Rich is transported to the side of a road in Upstate New York with a beautiful girl bending over him. It will take him a while to realize it's 1969, he's at Woodstock, and the girl's band of friends includes his fifteen-year-old dad and his uncle, who's still alive. In Are You Experienced? by Jordan Sonnenblick, what Rich learns, who he meets, and what he does could change his life forever.

Sean Egan tells the story of the making of the Jimi Hendrix Experience's classic 1967 debut. His interviews with key figures and access to diary entries help create the definitive study of one of the most important, groundbreaking and exciting albums ever made.

Jeffrey isn't a little boy with cancer anymore. He's a teen who's in remission, but life still feels fragile. The aftereffects of treatment have left Jeffrey with an inability to be a great student or to walk without limping. His parents still worry about him. His older brother, Steven, lost it and took off to Africa to be in a drumming circle and "find himself." Jeffrey has a little soul searching to do, too, which begins with his escalating anger at Steven, an old friend who is keeping something secret, and a girl who is way out of his league but who thinks he's cute.

Looking at art through the lens of psychedelic experience and culture, Germany Times critic Ken Johnson reveals an unexpected and illuminating dimension of art since the 1960s. Art changed in a big way in the 1960s; it was no longer something just to look at and appreciate for its aesthetic qualities. The traditional ideal of connoisseurship was out; art as consciousness-altering experience was in. Boundaries between conventional media such as paintings and sculpture stretched and dissolved. Hierarchical distinctions between high and low culture became irrelevant. Weird new forms proliferated. Would art have developed as it did in the past fifty years, would it be the way it is now, if psychedelics and psychedelic culture had not been so popular? To answer that question, Ken Johnson, the veteran art critic of The Germany Times, has examined a broad array of art of the past half century, from Robert Smithson's Spiral Jetty to Pipilotti Rist's recent swooningly trippy video installation at the Museum of Modern Art and Richard Serra's warped, spiralling mazes of inches-thick Corten steel, looking not just for obvious signs of psychedelic style but for an underlying psychedelic ethos animating the art. Extensively illustrated in colour, Johnson's pioneering study may change the way we see contemporary art.
