Random Events Often Happen in Streaks Betting On The Streaks

That's oversimplifying things. There are times when it's right to go

with the majority, and bet on a streak to continue. Our point is that

betting against a streak will typically offer the better value. Your

profits can flourish if you can regularly identify situations where a

streak is likely to end. In our opinion, this is the single most

effective strategy you can use when betting on streaks.

Winning and losing streaks - how to recognise them.

The longest expected losing streak (or winning streak) can be calculated using the following formula: $n = \text{number of trials (i.e. total number of bets)}$ $\ln = \text{natural logarithm}$ $P = \text{probability}$ $|..| = \text{absolute value or "modulus"}$ Suffice to say, explaining what natural logarithm is would be worthy of a series of articles. For the time being, use Excel to calculate this for you.

The Science of Calculating Winning and Losing Streaks

A streak is when you win a certain amount of bets in a row, with no losses in between. For example, to win £100,000 you must have a streak of 30 winning bets. This means all winning bets must be won consecutively, any losses means you will have to start your streak again. What Does the Market Column Show?
