~~Biothreat Agents and Emerging Infectious Disease in the ...~~

Since the terrorist attack on the United States on September 11, 2001 and subsequent cases of anthrax in Florida and New York City, attention has been focused on the threat of biological warfare and bioterrorism. Biological warfare agents are defined as "living organisms, whatever their nature, or infected material derived from them, which are used for hostile purposes and intended to cause disease or death in man, animals and plants, and depend for their effects on the ability to multiply ...

~~(PDF) EMERGING INFECTIOUS DISEASE AND BIOTERRORISM~~

Finally, although probably provoking a severe health and societal crisis, bioterrorism is a variation of the natural emergence of infectious diseases. The medical counter-measures against a bioterrorist occurrence or a natural emergence are frequently overlapping, as exemplified by the use of polyclonal serum during an outbreak of anthrax in drug users, or the Ebola vaccine in the outbreaks in Africa this decade.

~~The threat of bioterrorism — The Lancet Infectious Diseases~~

Regular review of the management of bioterrorism is essential for maintaining readiness for these sporadically occurring events. This review provides an overview of the history of biological disasters and bioterrorism. I also discuss the recent recategorization of tier 1 agents by the U.S. Department of Health and Human Services, the Laboratory Response Network (LRN), and specific training and ...
