The longest river in the world is the Nile in Africa. It is 4,130 miles long. The longest rivers in Britain are the Severn (220 miles long) and the Thames (215 miles long). The river that carries the most water in the world is the Amazon in South America. The Amazon carries 210,000 cubic metres of water into the sea every second.

River systems that may have existed in the past Amazon-Congo. The Amazon basin formerly drained westwards into the Pacific Ocean, until the Andes rose and reversed the drainage.. The Congo basin is completely surrounded by high land, except for its long narrow exit valley past Kinshasa, including waterfalls around Manyanga. That gives the impression that most of the Congo basin was formerly ...

List of rivers by length - Wikipedia

"Rivers of Babylon" is a Rastafari song written and recorded by Brent Dowe and Trevor McNaughton of the Jamaican reggae group The Melodians in 1970. The lyrics are adapted from the texts of Psalms 19 and 137 in the Hebrew Bible. The Melodians' original version of the song appeared on the soundtrack album for the 1972 movie *The Harder They Come*, which made it internationally known. The song was re-popularised in Europe by the 1978 Boney M. cover version, which was awarded a platinum disc and is o

water that flows in a channel with defined banks . Modern usage includes rivers that are multichanneled, intermittent, or ephemeral in flow and channels that are practically bankless. The concept of channeled surface flow, however, remains central to the definition.□

## List of rivers | Britannica

A river is a natural flowing watercourse, usually freshwater, flowing towards an ocean, sea, lake or another river. In some cases a river flows into the ground and becomes dry at the end of its course without reaching another body of water. Small rivers can be referred to using names such as stream, creek, brook, rivulet, and rill. There are no official definitions for the generic term river as ...

Rivers - definition of rivers by The Free Dictionary

A river is a stream of water that flows through a channel in the surface of the ground. The passage where the river flows is called the river bed and the earth on each side is called a river bank. A river begins on high ground or in hills or mountains and flows down from the high ground to the lower ground, because of gravity. A river begins as a small stream, and gets bigger the farther it flows.
