While feline anesthesia is a routine procedure in many veterinary practices, studies show that the likelihood of anesthetic mortality is higher in cats than it is in dogs. In 2018 the American Association of Feline Practitioners (AAFP) issued new safety guidelines in an effort to prevent anesthetic-related mortalities.

## ~~Feline Anesthesia: Protocol, Side Effects and ...~~

At home, the continuum begins with the pet owner administering prophylactic drugs like analgesics and anxiolytics as well as fasting the pet. In the hospital, the anesthesia continuum includes all of the following four phases of anesthesia: preanesthesia, induction, maintenance, and recovery. Anesthesia starts with a preanesthetic evaluation and stabilization (if necessary) of the patient, preparation of all of the anesthetic equipment, and selection of appropriate drugs with precise ...

## ~~2020 AAHA Anesthesia and Monitoring Guidelines for Dogs ...~~

Data and empirical experience have shown that cats undergoing anesthesia continue to have an increased mortality rate compared with dogs. 1,2 These Guidelines address specific causes of this disparity and ways of avoiding perioperative complications associated with monitoring, airway management, fluid therapy and recovery. Additionally, the Guidelines discuss other important aspects of feline anesthesia, including perianesthetic anxiety and stress, perianesthetic monitoring by physical and ...
