This book examines in detail the role of transfontanellar pulsed and color Doppler imaging in the fetus and neonate. After an introductory chapter its use in the normal neonate is considered. Results of the hemodynamic evaluation of 491 newborns aged from 32 weeks of gestation to 9 months by means of pulsed and color Doppler are reported. Normal values of the resistive index as determined by this technique are documented, and systolic, diastolic, and mean velocities in seven different vessels are presented. It is concluded that Doppler ultrasonography enables reliable analysis of arterial and venous velocities. Subsequent chapters examine the use of transfontanellar Doppler imaging in a variety of commonly encountered pathological conditions.

An analysis of Mozart's Clarinet Concerto - of supreme importance as the composer's last instrumental work.

"Read this book, of course." –Publishers Weekly NBC NATIONAL INVESTIGATIVE CORRESPONDENT AND HOST OF “ROSSEN REPORTS” ON TODAY BRINGS THE ULTIMATE HANDBOOK TO LIFE. Do you know where to take shelter in an earthquake? How to bust a lying car mechanic? Save money at the store? You’ll know now. Every morning, millions of Americans watch Jeff Rossen explain how to solve our most harrowing problems, such as: how to put out a kitchen fire, find bedbugs, avoid rip-offs, and even how to survive a plane crash. In Rossen to the Rescue, he includes daring experiments, expert advice, and game plans for handling all the wild cards in life—big and small—while sharing personal, and sometimes embarrassing, anecdotes that he couldn’t tell on television. Overflowing with never-before-seen tips and tricks, this book is filled with enough hacks to keep you and your family safe...and it just might save your life.

The bestselling book revealing why Americans are so fearful, and why we fear the wrong things--now updated for the age of Trump In the age of Trump, our society is defined by fear. Indeed, three out of four Americans say they feel more fearful today than they did only a couple decades ago. But are we living in exceptionally perilous times? In his bestselling book The Culture of Fear, sociologist Barry Glassner demonstrates that it is our perception of danger that has increased, not the actual level of risk. Glassner exposes the people and organizations that manipulate our perceptions and profit from our fears: politicians who win elections by heightening concerns about crime and drug use even as rates for both are declining; advocacy groups that raise money by exaggerating the prevalence of particular diseases; TV shows that create a new scare every week to garner ratings. Glassner spells out the prices we pay for social panics: the huge sums of money that go to waste on unnecessary programs and products as well as time and energy spent worrying about our fears. All the while, we are distracted from the true threats, from climate change to worsening inequality. In this updated edition of a modern classic, Glassner examines the current panics over vaccination and "political correctness" and reveals why Donald Trump's fearmongering is so dangerously effective.
