Everyone agrees that Balzac is a realistic writer, but what do we actually mean when we say that? This book examines the richness and variety of Balzac's approaches to realism, employing several different interpretive methods. Taking love and money as the "Prime Movers" of the world of La Comédie humaine, twenty-one chapters provide detailed analyses of the many strategies by which the writing forges the powerful impression of reality, the construction we famously think of as Balzacian realism. Each chapter sets the methods and aims of its analysis, with particular attention to the language that conveys the sense of reality. Plots, devices, or interpretive systems (including genealogies) function as images or reflections of how the novels make their meanings. The analyses converge on the central point: how did Balzac invent realism? No less than this fundamental question lies behind the interpretations this book provides, a question to which the conclusion provides a full answer. A major book in English devoted entirely to Balzac was overdue. Here is the American voice of Balzac studies, an engaging, insightful, and revealing excursion among the masterworks of one of the most important authors of all time.

The Flowers of Evil (1857) is a collection of poems by Charles Baudelaire. Translated into English by Cyril Scott in 1909, Baudelaire's poems remain lively and idiosyncratic nearly two centuries after they came into existence. Comprised mostly of sonnets and short lyrics, The Flowers of Evil captures Baudelaire's sense of the changing role of the poet in modern life. Rather than focus on beauty and other ideals, Baudelaire explores the totality of human experience—the good, bad, and ugly of life on earth. “When by the changeless Power of a Supreme Decree/ The poet issues forth upon this sorry sphere, / His mother, horrified, and full of blasphemy, / Uplifts her voice to God, who takes compassion on her.” In his opening benediction, Baudelaire reverses the typical trope of invoking the muses or celebrating poetry as a divine gift. Instead, he depicts the poet as a being cursed, a “hideous Child of Doom.” Childhood for Baudelaire is a subject of particular interest, a time described, in his poem “The Enemy,” as “a ravaging storm, / Enlivened at times by a brilliant sun. . .” The youthful experience of melancholy clearly informs the poet's outlook as an adult: “Time devours our lives, / And the enemy black, which consumeth our hearts / On the blood of our bodies, increases and thrives.” While much of Baudelaire's work deals with darkness and despair, his poems can rise to the heights of celebration and ecstasy, his voice soft and sweet as he invites his sister on a journey to an imagined land of “order and loveliness, /Luxury, calm and voluptuousness.” Ultimately, Baudelaire's vision—however irreverent—is guided by truth and morality, which drive him on a torturous path from good to evil, beauty to death, and back. With a beautifully designed cover and professionally typeset manuscript, this edition of The Flowers of Evil is a classic of French literature reimagined for modern readers.

Jesus undoubtedly suffered from paranoid schizophrenia with hallucinations, delusions and paranoia. The purpose of this book is to provide a psychiatric portrait of the historical figure known as Jesus of Nazareth, the founder of Christianity. Such a title is indeed shocking, but after a detailed analysis of the words and actions of Jesus mentioned in the Gospels, it clearly appears that he suffered from a serious mental illness: schizophrenia with hallucinations, delusions and paranoia. Jean-Philippe Cossette is a former Jehovah's Witness and now a psychiatric nurse.

Tattooed Memory (La Mémoire tatouée) is the first novel of the great Moroccan critic and novelist Abdelkébir Khatibi (1938-2009). Only one other novels has been translated into English (Love In Two Languages, 1991). Khatibi belongs to the generation following the foundational generation of writers such as Driss Chraïbi. For Khatibi's generation, French colonialism is a vibrant memory - but a memory from childhood. Tattooed Memory is part bildungsroman, part anticolonial treatise, and part language experiment, and it takes us from earliest childhood memory to young adulthood.
