the clinical child interview - [don-simmonds.co.uk](http://don-simmonds.co.uk)

To obtain a child's perspective during a mental health assessment, he or she is usually interviewed. Although researchers and clinicians generally agree that it is beneficial to hear a child's account of his or her presenting issues, there is debate about whether children provide reliable or valid clinical information during these interviews.

Clinical Child Psychology Interviews with children about  
The child interview is designed to elicit information about the child's own understanding of the problematic behavior. The clinician is also interested in learning what the child thinks causes those problems. The interview will typically explore the child's emotions surrounding the concerns of their caregivers and teachers.

## Child Development & Interviewing Children

interview with a child The Interview Setting A home visit allows you an opportunity to enter that particular child's world and learn about the child's home and play environment. When doing a home visit, I always take certain items which I may want to use in the interview. The items depend on the age of the child and on the information I am trying to elicit.
