Clinical Perspective of Complete Denture Prosthodontics ...

A complete denture is a removable appliance used when all teeth within a jaw have been lost and need to be prosthetically replaced. In contrast to a partial denture, a complete denture is constructed when there are no more teeth left in an arch, hence it is an exclusively tissue-supported prosthesis. A complete denture can be opposed by natural dentition, a partial or complete denture, fixed appliances or, sometimes, soft tissues.

Clinical Perspective of Complete Denture Prosthodontics ...

Abstract. The copy denture technique is a misnomer for the clinical and laboratory procedures involved in making complete dentures that replicate most of the features of the original prosthesis. The aim is to replicate the good features of an otherwise successful prosthesis that now requires replacement and to alter the poor features and so it is strictly speaking not a copy.

Complete denture copy technique—A practical application ...

Objective of complete denture 1) Preservation of the remaining tissues in health state. 2) Restoration of the function of mastication. 3) Restoration of the disturbed facial dimension and contour (esthetic). 4) Correction of speech due to the loss of natural teeth. 5) Satisfaction, pleasing and comfort of the patient.
