Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of competition law and its interpretation in Slovenia covers every aspect of the subject- the various forms of restrictive agreements and abuse of dominance prohibited by law and the rules on merger control; tests of illegality; filing obligations; administrative investigation and enforcement procedures; civil remedies and criminal penalties; and raising challenges to administrative decisions. Lawyers who handle transnational commercial transactions will appreciate the explanation of fundamental differences in procedure from one legal system to another, as well as the international aspects of

Read Book Competition Law In Slovenia

competition law. Throughout the book, the treatment emphasizes enforcement, with relevant cases analysed where appropriate. An informative introductory chapter provides detailed information on the economic, legal, and historical background, including national and international sources, scope of application, an overview of substantive provisions and main notions, and a comprehensive description of the enforcement system including private enforcement. The book proceeds to a detailed analysis of substantive prohibitions, including cartels and other horizontal agreements, vertical restraints, the various types of abusive conduct by the dominant firms and the appraisal of concentrations, and then goes on to the administrative enforcement of competition law, with a focus on the antitrust authorities' powers of investigation and the right of defence of suspected companies. This part also covers voluntary merger notifications and clearance decisions, as well as a description of the judicial review of administrative decisions. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in Slovenia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of international and comparative competition law.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides a systematic approach to legislation and legal practice concerning energy resources and production in Slovenia. The book describes the administrative organization, regulatory framework, and relevant case law pertaining to the development, application, and use of such forms of energy as electricity, gas, petroleum, and coal, with attention as needed to the pervasive legal effects of competition law, environmental law, and tax law. A general introduction covers the geography of energy resources, sources and basic principles of energy law, and the relevant governmental institutions. Then follows a detailed description of specific legislation and regulation affecting such factors as documentation, undertakings, facilities, storage, pricing, procurement and sales, transportation, transmission, distribution, and supply of each form of energy. Case law, intergovernmental cooperation agreements, and interactions with environmental, tax, and competition law are explained. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for energy sector policymakers and energy firm counsel handling cases affecting Slovenia. It will also be welcomed by researchers and academics for its contribution to the study of a complex field that today stands at the foreground of comparative law.

Essay from the year 2006 in the subject Business economics - Economic Policy, grade: 5,0 (sehr gut), University of Pécs (Faculty of Business and Economics), course: Public Policy I, 23 entries in the bibliography, language: English, abstract: This essay includes a general overview of competition policy in the European Union. Special attention is spent on the development of Competition Policy of the Republic of Slovenia.

Private enforcement of competition law, in particular through damages actions, is recently one of the highly debated topics in European competition law. Arguments for private enforcement are based on the EU principle of effectiveness, while existing national substantive and procedural regimes applicable to damages may be ill-suited for the effective enforcement of EU competition law. However, the risk that the

Read Book Companion Law In Slovenia

introduction of enforcement-oriented measures into national law is incompatible with private (civil) law is often underestimated or neglected. This book aims to reconcile both EU enforcement and private law perspectives through a detailed study of the English and Slovenian private law systems. Research on the compatibility of EU competition-enforcement-oriented measures with the private law regimes in England and Slovenia is used to argue that some changes to private law (based on proposals for effective enforcement) go too far and risk undermining the integrity of the Legal systems. This book already takes into account the 2014 Directive on antitrust damages actions.

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Slovenia deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Slovenia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.
