The concrete culverts are manufactured with a smooth mould finish, which allows water to flow freely through the channel. The units interlock to ensure perfect alignment and are easily sealed.

Installation of the precast units is exceptionally fast, they

Download Free Concrete Pipe

are placed directly onto a prepared foundation, no additional fixing is required.

~~Precast Concrete Box Culverts — JP Concrete~~

Precast concrete box culverts fulfil the current design life requirements for buried structures. They require minimum maintenance and provide many years

Download Free Concrete Pipe

of service, therefore making them the most cost-effective means of diverting watercourses.

Furthermore, they are especially practical with the ever-present risk of corrosive elements in the water or soil.

Benefits of using precast concrete Box Culverts include: Structural strength and long-life performance

The box culvert is a rigid frame structure and very simple in construction; It is suitable for non-perennial streams where scrub depth is not significant but the soil is weak. The bottom slab of the box culvert reduces pressure on the soil. Box culverts are

Download Free Concrete Pipe

~~Box Culvert Installation~~
economical due to their rigidity and monolithic action and separate foundations are not required.
