Control System By Goyal - sima.notactivelylooking.com

Control Systems Introduction. A Control System is a system in which the output is controlled by varying the input. The first control system device was James Watt's Flyball governor, which was invented in 1767. The aim of inventing Flyball governor was to keep the speed of the engine constant by regulating the supply of the steam to the engine. In a control system, the behavior of the system is described by the differential equations.
