the data table below.

Solved: LAB-AIDS #603S

INVESTIGATING AND APPLYING GENETICS ...

In this laboratory, students will •
use corn to study genetic crosses.

- recognize contrasting phenotypes.
 - collect data from F2 ears of corn.
 - study dominance, segregation, and independent assortment of alleles in corn.
 - compare predicted results with results obtained from actual data.
- Before doing this laboratory students should understand

The Biology Corner

Genetic engineering, also called genetic modification or genetic manipulation, is the direct manipulation of an organism's genes using biotechnology. It is a set of technologies used to change the genetic makeup of cells, including the transfer of genes within and across species boundaries to produce improved or novel organisms. New DNA is obtained by either isolating and copying the genetic ...
