A Crash Course in Project Management - Info0
 I think grad school, and especially a PhD, is a crash course in project management. Here we are organizing four to five studies, many of which require new techniques, coordination of resources, and have items that are dependent on earlier work. When we first start to think of our projects, the world is our oyster.

The PhD Thesis - A Crash Course in Project Management ...
 Project crashing is when you shorten the duration of a project by reducing the time of one or more tasks. Crashing is done by increasing the resources to the project, which helps make tasks take less time than what they were planned for. Of course, this also adds to the cost of the overall project.

The authors provide indispensable practical checklists, templates, and exercises to reinforce your learning of these concepts. The book includes dozens of tricks, insights, and contributions from real project managers sharing what has made a difference for them when managing real-world projects. If you are looking for easy-to-use tools and processes to make an immediate impact on your current IT projects, PM Crash Course for IT Professionals is the resource for you. Rita Mulcahy, PMP, founder and CEO of RMC Project Management, is the most popular project management author in the world. Since 1991, hundreds of thousands of project managers have utilized her 30+ best-selling books and resources to expand their project management knowledge and further their careers. Real-World Issues Covered: • Understanding why IT projects fail--and preventing failure • Defining effective IT project charters and requirements • Organizing IT roadmaps into manageable projects • Capturing, creating, and using historical data • Establishing "soft" and "hard" project metrics and milestones • Defining project scope, and avoiding scope creep • Identifying and managing stakeholders and expectations • Choosing the right PM tools for your needs--including in-house, hosted, and cloud-based solutions

The main role of the project management crash course is to effectively capture the essence of project management in a short amount of time for those who are just getting started with managing projects or wish to become future entrepreneurs. Small workshops during the project management crash course provide ample opportunities for working with the key management tools as well as proper techniques towards planning, executing, controlling, and completing the multiple projects. Through brief, facilitated exercises in the crash course that are aligned with the given standards of project management, the students get an opportunity to learn about the basic project management techniques for defining the critical success factors that are necessary for managing any project of any type, size, or complexity. Effective communications for developing partnerships with the leading stakeholders is also highlighted as a significant key to achieving the success of project management in this crash course.
