Dasgupta Algorithms Solution
1 Algorithms with Numbers 1.1 To start, the case of b = 2 is proved by first maximizing the value of the three single digit numbers that are going to be added together, call it a. So then a = b - 1. Adding three of those together would then be 3 a = 3 b - 3 = 3 = 0 b 11, which is a two digit number.

Algorithms\_DPV\_Solutions. My solutions for Algorithms by Dasgupta, Papadimitriou, and Vazirani The intent of this solution key was originally just to practice. But then I realized that this key was also useful for collaborating with fellow CS170 students as well. For corrections email raymondhfeng@berkeley.edu.
