Night sweats are when you sweat so much that your night clothes and bedding are soaking wet, even though where you're sleeping is cool. Adults and children can get night sweats. Non-urgent advice: See a GP if you: have night sweats regularly that wake you up or you're worried;

~~Night sweats - NHS~~

The side facing the Sun is bathed in light and heat ☐ we call this daytime. The side facing away is cooler and darker, and experiences night. Because the Earth is constantly spinning, the line between day and night is always moving around the planet. A day on Earth lasts 24 hours ☐ that is how long it takes for the planet to spin around once.
