The Detroit 53 series two cycle diesel was introduced in 1957. Although the engine used a roots type blower like its larger 71 series counterpart, it's classified as a naturally aspirated engine. Rather than being used strictly for performance reasons, the blower's purpose was to facilitate scavenging in the cylinder during the exhaust stroke.

Detroit 63 Series Two Stroke Diesel Specs & History

1957: Detroit Diesel introduced the Series 53 engine, and put the Series 71 engine into use for both on-highway and off-road use. All engines within a Series were designed so that a vast majority of parts were interchangeable, facilitating production of many models of various horsepower by adding cylinders.
