~~1/2 Digital Le Communications And The Tetra System~~

The communication chain is constituted by a source and a recipient, separated by a transmission channel which may represent a portion of cable, an optical fiber, a radio channel, or a satellite link. Whatever the channel, the processing blocks implemented in the communication chain have the same foundation.

Digital Cluster Report 2015-6 Digital Networks and Communication. The cluster focuses on the digital - both as an object of inquiry and a field of study. It explores the differences the digital might make to our research methods, and to our broader understandings of social, political and psychological life. One key area of inquiry focuses on big data, but also on online behaviour and group dynamics, including information-foraging and decision-making processes, as well as the social and ...

~~Digital Media and Society MA | University of Leicester~~

Data transmission and data reception (or, more broadly, data communication or digital communications) is the transfer and reception of data (a digital bitstream or a digitized analog signal) over a point-to-point or point-to-multipoint communication channel. Examples of such channels are copper wires, optical fibers, wireless communication channels, storage media and computer buses.

Our BA in Media and Communication is designed to provide you with an understanding of a wide range of contemporary issues related to the theory, development and practice of mass and interactive communication, both nationally and internationally.

~~Media and Communication BA | University of Leicester~~

“Digital marketing refers to the marketing of goods and/or services using digital channels, which in most cases means via the Internet or online.” “Digital marketing extends beyond internet marketing to include channels that do not require the use of the internet. It includes mobile phones (both SMS and MMS), social media marketing, display advertising, search engine marketing, and any other form of digital media.”
