In the nearly four decades since the First International Symposium on Victimology convened in Jerusalem in 1973, some concepts and themes have continued to hold a prominent place in the literature, while new ones have also emerged. Exploring enduring topics such as conceptions of victimhood, secondary and hidden victimization, and social services for victims along with more recent issues, the International Handbook of Victimology provides an interdisciplinary study of the topic from a diverse range of professionals on the cutting edge of victimology research. Forty experts from top research facilities and universities around the world provide input on the traditional longstanding issues that surround the field of victimology and explore newer themes such as restorative justice, the use of government-sponsored crime victimization surveys, compensation and restitution schemes, and victims' rights legislation. The second in a trilogy of volumes, this handbook examines victimology from criminology, sociology, psychology, law, and philosophy perspectives. Topics discussed include: Theoretical and historical frameworks used in the study of victimology Advances in research methods, including GIS technology Patterns of victimization, including drug- sex-, and work-related Responses to victimization by the victim and society

Restorative justice issues Victimization as it occurs in various social divisions Describing current research and identifying new ideas and topics of concern, the book collectively presents the “state-of-the-art” of the field today. In doing so, it helps to inform contemporary understanding of an eternal societal plague. Those wishing to continue their studies should consult the International Handbook of Criminology and the International Handbook of Penology and Criminal Justice, which complete the trilogy.

A large number of people each year make their reading decisions on the basis of prizes like the Booker and Orange Guide to Fiction. This new title in the successful Must-Read series provides an overview of prize-winning fiction over the decades. With 100 titles fully featured and over 500 read-on recommendations, this unique survey of literature incorporates some of the finest contemporary fiction ever produced including Salman Rushdie's *Midnight's Children* (Booker), Jonathan Coe's *What a Carve Up* (John Llewellyn Rhys), Andrea Levy's *Small Island* (Orange), Louis de Bernieres's *Captain Corelli's Mandolin* (Commonwealth Writers' Prize), Zadie Smith's *White Teeth* (Guardian First Book Award), Arundhati Roy's *The God of Small Things* (Booker). As well as Booker and Pulitzer prize-winners the book also finds room for those that have triumphed in less familiar prizes, such as the Betty Trask and the John Llewellyn Rhys. It looks at prize winners in certain genres such as crime and science fiction, as well as prize winners from other countries: the French Prix de Goncourt and the Australian Miles Franklin award. Because of the sheer range of prizes across countries and genres - this is a diverse and rich list that no book worm would want to be without.
