Electronic Warfare (Defense, Security and Strategy) ...

Electronic Warfare (Defense, Security and Strategy) Adam T. Elsworth. For military planners, the control of information is critical to military success, and communications networks and computers are of vital operational importance. The use of technology to both control and disrupt the flow of information has been generally referred to by several names, information warfare, electronic warfare, cyberwar, netwar, and Information Operations (IO).

Electronic Warfare (Defense, Security and Strategy) | Adam ...

Electronic warfare (EW) detects, interprets, controls or disrupts signals in the electromagnetic (EM) spectrum, typically radar, radio or infrared transmissions, to protect military assets from potential threats. Operating in three ways, EW ranges from passively providing situational awareness to detecting and actively disabling enemy transmissions or threats:

Electronic Warfare (Defense, Security and Strategy ...

Electronic warfare (EW) is gearing up in South Asia and the analysts are opining about the greater role of India in it, coupling it with cyber warfare (CW). The threat, in this scenario, is not Pakistan but China. Nonetheless, it will create security dilemma for Pakistan at the same time. Hence, the talks on the eastern side of the border are revolving around the possible reforms in Indian armed services.

The Pentagon on Oct. 29 released a strategy for military use of the electromagnetic spectrum that could ultimately spur the creation of a new combatant command to oversee those operations. The Defense Department has waged war via the electromagnetic spectrum for decades, using aircraft like the E/A-18G Growler and the EC-130H Compass Call to jam electronic signals and transmit computer code to other wireless devices.

DOD Strategy Paves New Path for Electronic Warfare - Air ...

"Electronic warfare capabilities may serve as a means of accessing otherwise inaccessible networks to conduct cyberspace operations; presenting new opportunities for offensive action as well as the need for defensive preparations." Existing DOD doctrine partially describes the relationship between electronic warfare and cyberspace operations.

Aligning Electronic and Cyber Warfare - GovInfoSecurity

Similarly, other military bodies across the globe are acquiring UAVs or developing them indigenously to strengthen their armed forces. Thus, the rising focus toward electronic warfare is expected to foster the growth of the global counter unmanned aerial vehicle defense system market during the forecast period.
