Embedded Librarians: Moving Beyond One-Shot Instruction by ...

by davidshumaker Last week, I finished reading “Embedded Librarians: Moving Beyond One-Shot Instruction”, the collection of essays edited by Cass Kvenild and Kaijsa Calkins, which I highlighted back on June 6. The last essay in the collection contains a succinct definition of “embedded” that I really like.

Another Definition of “Embedded” | The Embedded Librarian

Showcases strategies for successfully embedding librarians and library services across higher education. Chapters feature case studies and reports on projects from a wide variety of colleges and universities. --from publisher description.

Embedded librarianship is “not one size fits all,” yet many books on the subject treat it in a cold, objective manner that doesn’t adequately communicate how becoming an embedded librarian actually works in the real world. Here, Reale shares her own university classroom experiences to offer a step-by-step primer for those contemplating the practice. Demystifying what can sometimes feel intimidating to academic librarians, this down to earth resource defines what embedded librarianship is, and isn’t; explains why being in the classroom is so important, and how it creates communities of learning; shows how to clarify the role of the librarian in a classroom by being a “facilitator of process”; offers strategies for relationship building, setting goals, and honing a teaching style; and discusses embedded librarianship and branding. Readers will feel confident applying the lessons learned from Reale’s first-hand account

to their own experiences both in and out of the classroom.

It is absolutely essential that today's law librarians are digitally literate and possess an understanding and awareness of recent advancements and trends in information technology as they pertain to the library field. *Law Librarianship in the Digital Age* offers a one-stop, comprehensive guide to achieving both of those goals.

Loaded with recommended practices for increasing engagement and developing courses and programs for business owners, professionals, and job seekers in the community, this book points the way towards making the library an integral part of the business community in ways that are realistic and sustainable.

In the ongoing evolution of the academic library, embedded librarianship has become an important topic of debate across levels and departments. This book delves into the concept, examining everything from theory to best practices.

Embedded and Empowered: A Practical Guide for Librarians offers library professionals from all types of libraries a recipe for success in creating successful embedded librarians by providing easy-to-follow instructions, tips, and exercises.

This book constitutes the refereed proceedings of the European Conference on Information Literacy, ECIL 2014, held in Dubrovnik, Croatia, in October 2014. The 93 revised full papers presented together with two keynotes and one invited paper were carefully reviewed and selected from 283 submissions. The papers are organized in topical sections on theoretical framework; related concepts; research; rights and ethics; children; higher education; education and instruction; assessment and evaluation; libraries; different aspects.

Volume 7 of the series *Creating the 21st-Century Academic Library* is focused on new approaches and initiatives in marketing the academic library, as well as the importance of outreach through partnerships and collaborations both internal and external to the library.

Collaboration and the Academic Library: Internal and External, Local and Regional, National and International explores the considerable change that has affected universities and academic libraries in recent years. Given this complex and important context, it is clear that the academic library increasingly needs to operate in partnership with its users and other professionals and organizations to be successful in meeting the needs of its clientele. Academic librarians need to work closely with client groups so that services are relevant, and close partnerships with other professionals need to be forged to provide seamless services for users. The book looks at all aspects of collaboration affecting academic libraries, both internally and externally, to help the reader understand future directions for collaborative activities in a complex and difficult working environment. Considers collaboration issues affecting academic libraries Covers both internal and external collaboration Provides readers with direction for collaborative activities Shows how academic librarians can work with client groups to keep services relevant
