The Guide provides instruction in ISO code programming for Turning & Machining Centres covering a series of important aspects giving a thorough grounding in programme preparation, the programming possibilities and the extent of the standard functions. Automatic Cycles and Subroutines are controller specific, the OEM decides on Auxiliary Functions; included are examples that will give an understanding of the principles to apply to any machine and control, also featured are GE Fanuc and Siemens Controls. The Guide lists functions and codes under the reference JG and provides space to include data for specific machines and controls. Extensive examples show how-to programme the options and features. Component drawings have metric and imperial dimensions simply substitute the dimensions with those of the system of your choice. The Guide is your starting point; use the instructions and suggestions to build your own unique evolvable folder from here creating an invaluable personal handbook.

CSISE2011 is an integrated conference concentrating its focus upon Computer Science, Intelligent System and Environment. In the proceeding, you can learn much more knowledge about Computer Science, Intelligent System and Environment of researchers all around the world. The international conference will provide a forum for engineers, scientist, teachers and all researchers to discuss their latest research achievements and their future research plan. The main role of the proceeding is to be used as an exchange pillar for researchers who are working in the mentioned field. In order to meet high standard of Springer ?s Advances in Intelligent and Soft Computing ,the organization committee has made their efforts to do the following things. Firstly, poor quality paper has been refused after reviewing course by anonymous referee experts. Secondly, periodically review meetings have been held around the reviewers about five times for exchanging reviewing suggestions. Finally, the conference organization had several preliminary sessions before the conference. Through efforts of different people and departments, the conference will be successful and fruitful. We hope that you can get much more knowledges from our CSISE2011, and we also hope that you can give us good suggestions to improve our work in the future.
