Discovering it, it looks like an ancient fossil fish. But it can't be. The fossil fishes have all been extinct for eons... So begins the story of the coelacanth, a fish that survived the wave of extinction that killed the dinosaurs. From underwater quests for hidden populations to the dissection of the coelacanth's unique organs, this gripping scientific drama brings to life the thrill of discovery.

discovering the coelacanth

The coelacanths (/ ˌ s i ˌ l ə k æ n θ / SEE-lə-kanth) constitute a now-rare order of fish that includes two extant species in the genus Latimeria: the West Indian Ocean coelacanth (*Latimeria chalumnae*) primarily found near the Comoro Islands off the east coast of Africa and the Indonesian coelacanth (*Latimeria menadoensis*). They follow the oldest-known living lineage of Sarcopterygii ...

Describes the 1938 discovery of the coelacanth, a fish previously believed to be extinct, and subsequent research about it.

"An engrossing tale of obsession, adventure and scientific reasoning." —Betty Ann Kevles, Los Angeles Times In the winter of 1938, a fishing boat by chance dragged from the Indian Ocean a fish thought extinct for 70 million years. It was a coelacanth, which thrived concurrently with dinosaurs and pterodactyls—an animal of major importance to those who study the history of vertebrate life. *Living Fossil* describes the life and habitat of

# Download File PDF Fossil Fish Found Alive

the coelacanth and what scientists have learned about it during fifty years of research. It is an exciting and very human story, filled with ambitious and brilliant people, that reveals much about the practice of modern science.

A fascinating chronicle of the evolution of humankind traces the genetic history of the organs of the human body, offering a revealing correlation between the distant past and present-day human anatomy and physiology, behavior, illness, and DNA. Reprint. 75,000 first printing.

Describes William Hammer's discovery of the first dinosaur remains found in Antarctica.

# Download File PDF Fossil Fish Found Alive

In 1938, off the coast of South Africa, a woman found a strange blue fish with four stubby fins, pointed spines, and a funny looking tail—it was a coelacanth! Until that very moment, the world had believed that coelacanths were extinct. Suddenly, scientists around the world were excited—could more of these unusual creatures be found and studied? Discover how scientists worked to solve the mystery of these extraordinary fish.

Bright white teeth. Straight leg bones. Awkwardly contorted arm bones. On a hot summer day in 2005, Dr. Douglas Owsley of the Smithsonian Institution peered into an excavated grave, carefully examining the fragile skeleton

# Download File PDF Fossil Fish Found Alive

that had been buried there for four hundred years. "He was about fifteen years old when he died. And he was European," Owsley concluded. But how did he know? Just as forensic scientists use their knowledge of human remains to help solve crimes, they use similar skills to solve the mysteries of the long-ago past. Join author Sally M. Walker as she works alongside the scientists investigating colonial-era graves near Jamestown, Virginia, as well as other sites in Maryland. As you follow their investigations, she'll introduce you to what scientists believe are the lives of a teenage boy, a ship's captain, an indentured servant, a colonial official and his family, and an enslaved African girl. All are

reaching beyond the grave to tell us their stories, which are written in bone.

## Photo Books

Presents the history of the Civil War submarine the H.L. Hunley, including the construction, mysterious sinking, recovery, and restoration.

The young poet and artist offers his latest collection of verses, centered on the theme of hope--for the individual, the community, and the world.

Examines the coelacanth, a type of fish that scientists thought had become extinct during the time of dinosaurs, until a live one was discovered in 1938.

# Download File PDF Fossil Fish Found Alive

What a discovery! Deep under the Atlantic Ocean, divers found a shipwreck like no other. It was the H. L. Hunley, a submarine that had sunk during the Civil War! A team of scientists from all over the world came to work on the discovery. How would they raise the Hunley from the ocean floor? How would they open the submarine? And what would they find inside?
