Contact: Mojo 01633 615815. Since we last looked at a 32 Vanilla, Fox has upped the travel 10mm to 140mm (5.5in). It has also beefed up the lower casting especially around the fork brace. The lowers now feature some quad taper butting, which saves a load of weight, and Fox has also tightened up the bushings, which eliminates the loose headset feeling on some of the previous models.

The Bottom Line on the 2009 Fox Vanilla 32 RLC 15QR Fork In a market full of endless suspension adjustments, the Vanilla 32 RLC shines as an example of what has worked well for years. My first open-bath Marzocchi was buttery-smooth and this one from Fox Racing continues along that same path with a simple design that just plain works.

Color Print. The use of native plants in landscaping and of course habitat restoration is certainly not new. In fact, their use has grown exponentially in recent years. Natural resources professionals in turn have been flooded with requests for information on native plants to use in various types of planting projects. Communities, schools, businesses, nonprofit organizations, watershed groups, local governments, state and federal agencies and many others are enhancing and restoring habitat, solving ecological problems, reducing maintenance, or just beautifying surroundings, all using locally native plants. Natural resources professionals, in turn, have been flooded with requests for information on native plants to use in various types of planting projects. There are many excellent resources available on native plants - some more technical than others, some more comprehensive than others. The frustration voiced most frequently by users is the lack of color photographs of the plants. After all, it is the striking visual quality of these plants that is their best "selling point." This publication includes those pictures as well as user-friendly information on native species appropriate for planting in the Chesapeake Bay watershed and adjacent coastal regions. Although one guide cannot furnish the answers to every question, we have included as much useful information as possible in a limited space. Although the large number of species of plants included here may overwhelm some readers, this guide displays the great diversity of plants available. We hope you will bypass the over-used, non-native and sometimes invasive ornamental plants, and select the equally and often more attractive native plants. Pour through this guide the same way you look through nursery catalogs. Use it to plan and design your next planting, whether it's a small corner of your front yard, a two-acre meadow seeding, or 100 acres of wetland restoration.
