9780880118828 - Growth, Maturation, and Physical Activity ...

Abstract. Growth, maturation, and development dominate the daily lives of children and adolescents for approximately the first 2 decades of life. Growth and maturation are biological processes, while development is largely a behavioral process. The 3 processes occur simultaneously and interact. They can be influenced by physical activity and also can influence activity, performance, and fitness.

Top 10 Research Questions Related to Growth and Maturation ...

Phase 1: At the same time of the rapid growth in the brain and nervous system, there is also rapid physical development in the first few years of life before it begins to slow into steady growth during mid-to-late childhood (Phase 2). This is easier to see on a growth velocity curve but the average rate of growth in height is about 5-6 cm or so (2+ inches) per year between the ages of 4-5 and the onset of the adolescent growth spurt (10 in girls and 12 in boys, on average).
