type [1~8], and then select siren on/off [0/1], at last press [#] to confirm. You will hear the main unit emit a long beep and a voice prompt setting completed .

~~Intelligent GSM Auto-Dial Alarm System~~

Connect the power cable to alarm panel and switch it ON, now the system is ON. When turn on the system, it will try to make communication with GSM, so you need to wait 20 seconds, before any operation. After 20 seconds, you can press "UP" "DOWN" icon to check the GSM level. If the LCD display "NO SIM CARD", that means the system is not inserted with valid SIM or can not detect the SIM card. If it shows signal level like "15 OK", that means the alarm system can communicate with GSM network. 2 ...

User Manuals, often called Owner Manuals, explain the everyday operation of the system, and only include basic, user-level programming instructions. A User Manual will typically show you in simple terms how to arm, disarm, bypass zones, and possibly change your own passcodes. Functions covered in a User Manual usually include:
