Colgate-Palmolive Co.'s Hill's Pet Nutrition unit on Friday said it plans to invest more than \$250 million to build a new factory in Kansas to help meet growing demand for its pet foods.

China's prosperity is at the core of the emerging Platinum Age of global economic growth. Rapid economic growth has been underpinned by expansion in its domestic markets, and the integration of domestic and international markets in goods, services, capital, labour and foreign exchange. Global commodity prices have reached historic highs, while Chinas capital outflows have helped to hold down interest rates worldwide. Linking markets, both domestic and international, has been key to Chinas success. In sustaining its strong economic growth, China has become one of the worlds most voracious consumers of energy. The challenge now facing the government and people of China is in achieving cooperation with the international community to avert the costs - both economic and environmental - of accelerating energy consumption. CHINA: LINKING MARKETS FOR GROWTH gathers together leading scholars on Chinas economic success and its effect on the world economy into the next few decades.

This book applies regional analysis to the challenges facing global investment agencies seeking to enhance trade in lagging regions. It shows how spatial interaction and agent-based modelling can be used as the basis for developing new plans and policies. An in-depth analysis of trade routes is presented, which can be used to develop policies for increasing efficiency and reducing costs. Landlocked Uganda and the sea-locked South Pacific Islands serve to illustrate the problems of covering sizable distances, accelerating export flows and improving supply chain efficiency. These examples also provide an excellent illustration of the power of regional science, from assembling data bases in difficult situations to developing and applying models of the trade system.

An exploration of the impact of globalization on diverse cultures and how this effects the dominant languages across Asian civilisations.

Without doubt Richard Rorty is one of the most honored, famous and disputed philosophers of our days. All over the world interest in his inspiring and provoking thoughts goes beyond the circles of academic philosophy. The present volume includes "The Brain as Hardware, Culture as Software" and "Philosophy-Envy" of Richard Rorty, papers presented by students of the philosophy department at university of Münster and Rorty's responses to and comments on them. Rorty's lecture has been publicly presented at the 8. Münstersche Vorlesungen zur Philosophie on may 26th 2004. The students presented their intensively prepared papers on the following day. The volume gives an overview of the main topics of his philosophy as well as a detailed analysis of central concepts. "The papers are of very high quality indeed, and the level of discussion during the day I spent with the students was equally high. I have never, in any university, encountered students who combined such detailed knowledge of my writings with such penetrating criticisms of my views." (Richard Rorty)
