Identifying

Vertebrates Using Dichotomous Key

A dichotomous key is a tool that allows the user to

determine the identity of items in the natural world, such as trees, wildflowers, mammals, reptiles, rocks, and fish.

Keys consist of a series of choices

Acces PDF

Identifying

that lead the user to the correct name of a given item.

"Dichotomous" means "divided into two parts".

Therefore, dichotomous keys always give two choices in each step.

Identifying

Vertebrates Using Dichotomous Key

When teaching classification in science, a

dichotomous key is an easy tool to use.

In this activity,

students will

identify each

vertebrate group

based on their

characteristics.

Then, they will

classify animals

Acces PDF

Identifying
