The two volume set LNAI 10984 and LNAI 10985 constitutes the refereed proceedings of the 11th International Conference on Intelligent Robotics and Applications, ICIRA 2018, held in Newcastle, NSW, Australia, in August 2018. The 81 papers presented in the two volumes were carefully reviewed and selected from 129 submissions. The papers in the first volume of the set are organized in topical sections on multi-agent systems and distributed control; human-machine interaction; rehabilitation robotics; sensors and actuators; and industrial robot and robot manufacturing. The papers in the second volume of the set are organized in topical sections on robot grasping and control; mobile robotics and path planning; robotic vision, recognition and reconstruction; and robot intelligence and learning.

Business Information Systems: Concepts, Methodologies, Tools and Applications offers a complete view of current business information systems within organizations and the advancements that technology has provided to the business community. This four-volume reference uncovers how technological advancements have revolutionized financial transactions, management infrastructure, and knowledge workers.

Facilitated Stretching, Fourth Edition, examines techniques and guidelines for PNF stretches in a variety of settings. Stretches are demonstrated on a treatment table, mat on the floor, chair, cable-pulley machine, and weightlifting bench. Stretches are grouped according to each joint, and the majority of the stretches include both a partner stretch version and a self-stretch version. As in previous editions, specific routines are included for cycling, golf, running, swimming, throwing and racket sports, and now ice hockey. It also includes general stretches for everyday use, plus stretches for those with " rusty hinges. " These ready-made stretching routines make it easy to incorporate facilitated stretching into a workout regimen and take the guesswork out of organizing a stretching routine to match the needs of a specific sport.

International Conference on Advances in Pattern Recognition (ICAPR 98) at Plymouth represents an important meeting for advanced research in pattern recognition. There is considerable interest in the areas of image processing, medical imaging, speech recognition, document analysis and character recognition, fuzzy data analysis and neural networks. ICAPR 98 is aimed at providing an international platform for invited research in this multi-disciplinary area. It is expected that the conference will grow in future years to include more research contributions that detail state-of-the-art research in pattern recognition. ICAPR 98 attracted contributions from different countries of the highest quality. I should like to thank the programme and organising committee for doing an excellent job in organising this conference. The peer reviewed nature of the conference ensured high quality publications in these proceedings. My personal thanks to Mrs. Barbara Davies who served as conference secretary and worked tirelessly in organising the conference. I thank the organising chair for the local arrangements and our should also key-note, plenary and tutorial speakers for their valuable contributions to the conference. I also thank Springer-Verlag for publishing these proceedings that will be a valuable source of research reference for the readers. Finally, I thank all participants who made this conference successful.

Enhances libraries worldwide through top research compilations from over 250 international authors in the field of e-business.

This book provides the practical information you need to make the transition from traditional "vocational" education programs to the new approaches to career and technical education. It shows you how to organize your schools around relevant career majors using a variety of evolving school formats such as Career Major programs, Tech Prep programs, Academies, and Magnet Schools.

A culturally informed book that never loses sight of its fundamental purpose, PUBLIC SPEAKING: CONCEPTS AND SKILLS FOR A DIVERSE SOCIETY, 8e trains readers to be effective public speakers and listeners in a world filled with monumental cultural, political, and technological changes. It combines 2,500-year-old principles with up-to-date research into concepts, skills, theories, applications, and critical-thinking proficiencies essential for listening and speaking well. Discussions of classic public speaking topics are grounded in an awareness of the impact of cultural nuances that range from gender differences to co-cultures within the United States to the traditions of other nations-giving readers a heightened awareness of and sensitivity to their audience. Reflecting the latest research and practices, it includes new coverage of listening competencies, online courses, legacy journalism and native digital news outlets, MAPit, powerful language forms, and more. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

What do children ' s interactions on the playground have to do with foreign policy? How does science understanding in middle school relate to environmental disasters in third world countries? The causal patterns that we detect and how we act upon them pervade every aspect of our lives. These skills will only become more important in the future as our world becomes more global and more interconnected. Yet we aren ' t very skilled at thinking about causality. Research shows that instead we rely on limiting default assumptions that can lead to poor choices in a complex world. What can we do about it? This book offers ways to become aware of these patterns and to reframe our thinking to become more effective learners and citizens of the world. Through examples and accessible explanations, it offers a causal curriculum to enable more effective learning so that we can put the power of better causal understanding to work for ourselves and the next generation--- for today and tomorrow.

The Oxford Handbook of Lifelong Learning is a comprehensive and interdisciplinary examination of the theory and practice of lifelong learning, encompassing perspectives from human resources development, adult learning, psychology, career and vocational learning, management and executive development, cultural anthropology, the humanities, and gerontology.

Experiential learning is a singularly powerful approach to teaching and learning that is based on the fact that people learn best through experience. In this extensively updated book, the author offers the most complete and up-to-date statement of the theory of experiential learning and its modern applications in education, work, and adult development.
