Just-in-Time and Kanban The Kanban methodology is a critical element in implementing the Just-in-Time inventory system. Through Kanban companies are able to communicate their production needs in a systematic and efficient manner. It is important to highlight that Kanban works hand-in-hand with JIT.

Just in Time Inventory System | Kanban Zone

Kanban is a concept that relates to obtaining materials or required items “ just in time ” for their introduction into the assembly or process. The system of JIT or the just in time process was initiated by the Japanese firm Toyota in the 1940s. Kanban is a system to signal a need for action. This can be done by cards on a board (which is the traditional way) or by other devices that are used as markers, indicating the need to take action.
