How do you go from being happily married , beautiful children and a growing ministry to being homeless ,children taken and no job . I lost so much I felt alone. In the midst of my life going into a downward spiral , I held on to my God .I can truly say I went from the pit to the pulpit.

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

Islam encourages business and financial transactions as a way of securing the basic needs for all human beings, but these need to be conducted in accordance with the principles contained in the Qur'ān and Sunnah. However, these legal concepts are not classified subject-wise, and the verses on commercial law, like all other topics, are scattered throughout the Qur'ān, making it difficult for readers to gain a full understanding of the topic. This, therefore, is the first comprehensive book to demystify Islamic Contract Law and specifically Islamic Financial Contracts, and to examine its roots and history. The book is written in a clear style to allow for a greater understanding of the more challenging and misunderstood areas pertaining to Islamic business and financial contracts. It also contributes a series of chapters which address the market niche and need, concerning Shariah compliance for Islamic financial products and services. The book is divided into 16 chapters in order to provide a holistic and thorough overview of Islamic law of contract. It covers the objections and misconceptions surrounding Islamic business and financial contracts. It also includes the key features and guiding principles of Islamic law of contract and offers technical know-how, illustrating the concept of formation of a contract, as well as the essential elements of a valid contract. The authors also offer a discussion on the system of options under Islamic business and financial contracts and potential solutions to breach of contracts. The book will serve as a handy reference for scholars and students of Islamic business and finance and Islamic commercial law and will also be beneficial for practitioners as well as legal and judicial officers. It will open new doors for further research in the field of Islamic Financial Contracts.

David Garibaldi combines his innovations of funk from his Tower of Power days with his new innovations in Afro-Cuban music and demonstrates how to incorporate them into modern music. This video shows you how to become your own drummer and how to create your own signature sound. Booklet included.

Mathematics has been behind many of humanity's most significant advances in fields as varied as genome sequencing, medical science, space exploration, and computer technology. But those breakthroughs were yesterday. Where will mathematicians lead us tomorrow and can we help to shape that destiny? This book assembles carefully selected articles highlighting and explaining cutting-edge research and scholarship in mathematics.

Money and politics in an election that broke the mold Beginning with the 1960 election, readers could turn to one book for an authoritative and comprehensive examination of campaign finance at the federal level. Now, the latest in this respected series, Financing the 2016 Election, explores the role of money in one of the most unconventional elections in modern American history. A team of leading scholars has dug into the roles played by political parties and special interest groups (including their “Super PACS”) in the presidential and congressional elections of 2016. David Magleby and his team of

experts examined Federal Elections Commission reports and interviewed dozens of key participants, including representatives of virtually all the major interest groups active in the 2016 election cycle. They place that election in the context of how U.S. elections have been financed during recent decades—a context that illustrates how dramatically different campaign finance is today from the past. Among the most important changes has been the growth of so-called Super PACS, which have become increasingly important both in the financing they provide candidates and in their ability to act independently, both for and against candidates. Overall, Super PACS doubled their spending in 2016 from four years earlier. Taking a comprehensive approach, this book helps readers understand how the financing of elections—including the increasing reliance by candidates on outside special interest groups—ultimately affects politics and public policy.

Student satisfaction and course engagement levels increase with the use of instructor-generated videos - the subject of this book. Beginning by outlining the different types of videos you can create, and what the research says about their effectiveness, Karen Costa explains how they can be designed to reinforce learning, to align with and promote course outcomes, and to save you time across your courses. She then describes how to create successful videos with commonly available technologies such as your smartphone, and without a major investment of time, demonstrating the simple steps she took to develop her bank of videos and build her confidence to deliver short, straightforward learning aids that are effective and personal. If you've been wanting to include videos in your teaching but haven't found the time or confidence, this book will help you to develop a simple and sustainable video development process, supporting both your success and the success of your students.
