This fourth edition continues to take a traditional approach to supervision, while emphasizing contemporary themes such as leadership and empowerment. It takes a hands-on approach by offering self checks and end-of-chapter skill builders.

This indispensable tool for proposal writers, research students and project coordinators involved in large-scale data collection offers practical information on managing research projects. The book places emphasis on: applying good standards for data collection and processing; planning research activities; making budgetary decisions and budget control; hiring, training and supervising field interviewing staff; and ensuring high participant acquisition and retention rates, including techniques for locating lost participants. In addition, readers are shown the use of computerized information systems for the tracking of data collected and the data-management process.

Includes bibliography and indexes / subject, personal author, corporate author, title, and media index.

Addressing the practicalities of clinical supervision, this informative book follows the course of the supervision process, illustrating each stage with an absorbing blend of information, opinion, academic theory, anecdotal material, serious comment and thought-provoking exercises. Emphasis is placed on the purpose and value of clinical supervision, but also on the potential pitfalls those involved may encounter, and how they can be avoided. A number of theories and models are discussed with reference to each stage of supervision, providing a thought-provoking basis for the practical issues raised. Written in a lively and engaging style, this book will enable both supervisors and supervisees to get the best they can from the supervisory experience.
