The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of todays student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

This book was first published in 1991. It considers the concepts and theories relating to mostly aqueous systems of activity coefficients.

Wisdom Seekers: The Rise of the New Spirituality explores the origins and precursors of the New Age movement, its consolidation within the American counterculture of the late 1960s, and its development into an international spiritual perspective in contemporary Western society. The book considers the influence on the New Age of metaphysicians like Emanuel Swedenborg, Mesmer, Madame Blavatsky and Gurdjieff; pioneering thinkers like Freud, Jung and William James; and the contribution to New Age thought of Indian spiritual traditions and transpersonal psychology. Wisdom Seekers also describes the way in which the New Age paradigm has absorbed the most recent discoveries of quantum physics and consciousness research, and it explores the New Age focus on personal spiritual experience rather than formal religious doctrines.

An engaging introduction to collisionless shocks in space plasmas, presenting a complete review, from first principles to current research.
