Compared to Lycoming and Continental, the price Delta between overhauled and factory new on a Rotax is much less. For instance, even a modest engine such as Lycoming's O-320 costs nearly 70 percent more to buy new than to overhaul. Exchanges, says Paskevich and Lockwood, are good choices for owners or businesses who don't want the downtime ...

The 914 is more fuel efficient and lighter than similarly sized traditional engines, but originally had a shorter time between overhaul (TBO), restricting its market potential. On introduction, the TBO was only 600 hours, which was double that of previous Rotax engines but far short of existing engines of comparable size and power. However, by 1999 the TBO had been increased to 1,000 hours ...

It was a regular runner and it was out to TBO, no other reason for overhaul. This particular engine needed no hard parts other than rings. The pistons, cylinders, bearings were all still in Rotax like-new spec, showing no wear. They replaced the rings and soft parts (hoses, seals, etc.) and zero-timed the motor. I thought it was pretty impressive.
