As of Packet Tracer 5.0, Packet Tracer supports a multi-user system that enables multiple users to connect multiple topologies together over a computer network. Packet Tracer also allows instructors to create activities that students have to complete. Packet Tracer is often used in educational settings as a learning aid.

Packet Tracer - Wikipedia

Cisco Packet Tracer is a cross-platform network simulation tool that allows you to arrange nodes and connecting lines and emulate computer networks. The software serves as an educational tool for Certified Cisco Network Associate students. But, advanced users can also use this to create network topologies and learn fundamental CCNA concepts.

Download Cisco Packet Tracer 7.3.0 for Windows - FileHippo

In packet tracer, I am trying to setup multiple ssid's on a WLC, each on its own vlan. I would like clients to be able to connect to the ap's and get a dhcp address for the ssid they connect to. So far, I can only get clients to get a dhcp address from the management vlan, which is the native vlan in the trunk that the ap is on.

DHCP for multiple ssid. WLC, packet tracer - Cisco Community
