Declan McIntire, alpha of the Stone Ridge pack, spent over a century rejecting the daughters paraded under his nose, hiding his preference for a male. Scenting Lark Trystan at a pack BBQ, hes ecstatic to discover the cute, sexy human is his mate. Hes even more pleased that Lark knows about shifters and has been interacting with them for months. Declan quickly realizes the issue is his large size and dominant personality. Since the pack alpha is straight, Lark cant figure out why Declans suddenly taking an interest in him. He also doesnt understand why hes so drawn to the big man, especially considering his poor track record with relationships. Dominant men always seem to think hed make the perfect punching bag, and Lark has the scars to prove it. When Lark ends up in the hospital, Declan puts everything on hold, determined to take his mate home and prove that hes nothing like Larks previous lovers. But not everyone in his pack is accepting of a gay alpha. Can Declan find a way to reconcile the two? Or will he have to choose between the pack hes devoted his life to and the man who is quickly coming to hold his heart?

Modern marketing techniques in industrialized countries cannot be implemented without segmentation of the potential market. Goods are no longer produced and sold without a significant consideration of customer needs combined with a recognition that these needs are heterogeneous. Since first emerging in the late 1950s, the concept of segmentation has been one of the most researched topics in the marketing literature. Segmentation has become a central topic to both the theory and practice of marketing, particularly in the recent development of finite mixture models to better identify market segments. This second edition of Market Segmentation updates and extends the integrated examination of segmentation theory and methodology begun in the first edition. A chapter on mixture model analysis of paired comparison data has been added, together with a new chapter on the pros and cons of the mixture model. The book starts with a framework for considering the various bases and methods available for conducting segmentation studies. The second section contains a more detailed discussion of the methodology for market segmentation, from traditional clustering algorithms to more recent developments in finite mixtures and latent class models. Three types of finite mixture models are discussed in this second section: simple mixtures, mixtures of regressions and mixtures of unfolding models. The third main section is devoted to special topics in market segmentation such as joint segmentation, segmentation using tailored interviewing and segmentation with structural equation models. The fourth part covers four major approaches to applied market segmentation: geo-demographic, lifestyle, response-based, and conjoint analysis. The final concluding section discusses directions for further research.

"Long a secret weapon for the hedge-fund elite," says Trader Monthly, the DeMark Indicators are now used by more than 35,000 traders. This book provides an easy-to-follow system for using the indicators to identify market turns as they happen. Author Jason Perl gives a concise introduction to thirty-nine of the DeMark Indicators, and then shows how to combine the indicators and time frames to achieve a higher probability of trading success. Thomas R. DeMark, the creator of the DeMark Indicators and one of the most well-respected practitioners of technical analysis wrote the Foreword to this book. This is the second book in the Bloomberg Market Essentials™: Technical Analysis series, which covers the key elements of the most widely used technical analysis tools. Silver Medal Winner, Investing Category, Axiom Business Book Awards (2009) Winner: Book Series Cover Design, The Bookbinders Guild of New York/2009 New York Book Show Awards

This book explores Shaolin Chin Na by presenting 150 techniques with detailed instructions for teaching yourself.

Aron Zysow's 1984 Ph.D. dissertation, "The Economy of Certainty," remains the most important, compelling, and intellectually ambitious treatment of Islamic legal theory (usul al-fih) in Western scholarship to date. It continues to be widely read and cited, and remains unsurpassed in its incisive analysis of the most fundamental assumptions of Islamic legal thought. Zysow argues that the great dividing line in Islamic legal thought is between those legal theories that require certainty in every detail of the law and those that will admit probability. The latter were historically dominant and include the leading legal schools that have survived to our own day. Zahirism and, for much of its history, Twelver Shi'ism, are examples of the former. The well-known dispute regarding the legitimacy of juridical analogy is only one feature of this fundamental epistemological division, since probability can enter the law in the process of authenticating prophetic traditions and in the interpretation of the revealed texts, as well as through analogy. The notion of consensus in Islamic legal theory functioned to reintroduce some measure of certainty into the law by identifying one of the competing probable solutions as correct. Consequently consensus has only a reduced role, if any, in those systems that reject probability. Another, more radical, means of regaining certainty was the doctrine that regarded the legal reasoning of all qualified jurists on matters of probability as infallible. The development of legal theories of both types, that of Zahirism no less than that of Hanafism, was to a large extent shaped by theology and, most significantly, by Mu'tazilism, and subsequently by Ash'arism and Maturidism. Zysow's important work is published here in full, for the first time, with updated references and some further reflections by the author.

This revised and enlarged edition of a classic in Old Testament scholarship reflects the most up-to-date research on the prophetic books and offers substantially expanded discussions of important new insight on Isaiah and the other prophets.

Zero-Resistance Selling is your guide to literally "reprogramming" your own self-image to help you attain your loftiest selling and career goals. You'll find step-by-step strategies to harness the power of your imagination to wipe away resistance to your sales presentations ... become an irresistible "master closer" ... conquer self-defeating habits ... and use stress to your advantage.

Updated to reflect the latest technology in the automotive industry, this book will provide the knowledge and skills needed to successfully inspect, maintain, and repair vehicles of all makes and models. Automotive Service: Inspection, Maintenance, and Repair, 3E begins by introducing readers to a number of automotive career options, shop management basics, plus necessary tools and equipment. The book then progresses to the theories of vehicle systems operations and includes step-by-step procedures for troubleshooting and repairing all major systems of the modern automobile. Updates include coverage of new vehicle technology like EVAP systems, on-board diagnostics and emissions, alternative fuels, and hybrid vehicles, making this book not only comprehensive but also current so that readers can feel confident they are learning the very latest in industry trends and techniques.

Beccy Cole's inspirational memoir from the heart of Australian country music. Beccy Cole has country music in her blood. Daughter of a country music star, Carole Sturtzel, she is one of the most popular country singer-songwriters in Australia today. This is the story of her life - in her own words. At fourteen, Beccy was performing in her mother's group, Wild Oats. By her late teens, Beccy had teamed up with the Dead Ringer Band - Kasey Chambers' family band - and had attracted the attention of the country music world by winning the Star Maker quest: the same award that started the careers of Keith Urban, Lee Kernaghan, James Blundell and Gina Jeffreys. It was just the first of many awards and accolades for this multitalented woman with a big heart. With refreshing candour, Beccy shares her story: leaving everything she knew to pursue her dream, making a name for herself with her own band; her marriage and motherhood; her subsequent divorce, becoming a single mother and maintaining the nurturing love of family. Performing for the Australian troops in Afghanistan. Coming out, and what it has meant for her and her fans. Taking control of her own life - and finding love. Heartfelt and honest, Poster Girl is the inspirational memoir of a strong woman who epitomises the authentic spirit of country music, and of Australia.

Speaking of Teaching: Lessons from History focuses on teaching as a fundamental act of all human beings, viewing the question of teaching through the lens of five famous thinkers and two contemporary problems. Moran argues that teaching is not given the attention that it deserves and proposes to situate school teaching in the context of many forms of teaching. Tracing the history of the idea of teaching from Socrates to Wittgenstein in the first several chapters, this book also examines the intricacies of teaching morality and religion, showcasing society's ambivalence about teaching.
