Procurement is the process of acquiring the goods your company needs for its business model. Supply chain management is the process of turning those goods into products and distributing them to customers as efficiently as possible. In this guide, we ' ll explain the differences and the relationship between supply chain management and procurement.

Procurement vs. Supply Chain Management: What's Different?  
Purchasing and supply management involves critical steps of procurement, storing, and monitoring the general flow of goods in a store. It does not matter whether goods are for retail or otherwise. The manager in charge of this portfolio also takes care of the well-being of the workforce.

Purchasing and supply management - 1190 Words | Essay Example  
Purchasing is not about buying goods or services for a business for the lowest price. Purchasing professionals broadly contribute to their company ' s success by working to make the right buy, at the right time, for the right price and from the right source. From meeting business requirements to controlling costs and maintaining relationships, effective purchasing management strategies and tactics help companies meet key business objectives.

What Are the Objectives of Purchasing Management? | Bizfluent  
The term supply management, also called procurement, describes the methods and processes of modern corporate or institutional buying. This may be for the purchasing of supplies for internal use referred to as indirect goods and services, purchasing raw materials for the consumption during the manufacturing process, or for the purchasing of goods for inventory to be resold as products in the distribution and retail process. In many organizations, acquisition or buying of services is called contra
