beyond the traditional design professions into such domains as health, culture, education, and transportation. This book presents eighteen situated design methods, offering cases and analyses of projects that range from designing interactive installations, urban spaces, and environmental systems to understanding customer experiences. Each chapter presents a different method, combining theoretical, methodological, and empirical discussions with accounts of actual experiences. The book describes methods for defining and organizing a design project, organizing collaborative processes, creating aesthetic experiences, and incorporating

sustainability into processes and projects. The diverse and multidisciplinary methods presented include a problem- and project-based approach to design studies; a "Wheel of Rituals" intended to promote creativity; a pragmatist method for situated experience design that derives from empirical studies of film production and performance design; and ways to transfer design methods in a situated manner. The book will be an important resource for researchers, students, and practitioners of interdisciplinary design.

Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly,

misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

Consumer demand for plug-in vehicles remains very low and the Government grant to encourage demand may not be proving effective. The Government must do more to show that its plug-in vehicle strategy is a good use of public money. Carbon emissions from transport must be reduced if the UK is to meet its climate change targets, but public money must be targeted on effective policies. So far, Department for Transport expenditure on plug-in

cars - some £11 million - has benefited just a handful of motorists. There is a risk that the Government is basically subsidising second cars for affluent households. It is also unclear whether the provision of public charging infrastructure encourages demand for plug-in cars. Indeed, the Government does not even have a register of all the chargepoints installed at public expense
