## HTML5 responsive website templates | Webflow

It is called responsive web design when you use CSS and HTML to resize, hide, shrink, enlarge, or move the content to make it look good on any screen. Don't worry if you don't understand the example

# Online Library Responsive Web Design With Html5

below, we will break down the code, step-by-step, in the next chapters:

Responsive Web Design Introduction -  
W3Schools

Responsive web design (RWD) is an approach to web design that makes web pages render well on a variety of devices and window or screen sizes. Recent work also considers the viewer proximity as part of the viewing context as an extension for RWD. Content, design and performance are necessary across all devices to ensure usability and satisfaction.

Responsive web design - Wikipedia

Responsive web design gives web creators some tools for making layouts that respond to any screen size. This article uses fluid grids, flexible images and media queries to get the layout looking great regardless of the size of the device's screen dimensions.
