The Eighth edition of David Newman's Sociology: Exploring the Architecture of Everyday Life once again invites students into the world of sociological thought. Sociology encourages students to think less about the next test and more about how the subject applies to their everyday lives. In addition to updated coverage and fresh examples, this edition features revamped Micro-Macro Connections that have been even further honed to help students understand the link between individual lives and the structure of society.

Continuing his tradition of highly engaging, trade-like writing, best-selling author David Newman once again starts in a familiar place—the everyday world—and then introduces sociological concepts and institutions as they influence students' daily existence. Full of vivid, real-world examples and touching personal vignettes, this text offers a solid introduction to basic sociological concepts and helps students realize their role in constructing, planning, maintaining, and fixing society.

Sociology, Exploring the Architecture of Everyday Life: Readings underscores the "architecture" of social life—how we, as social beings, are always building and rebuilding our social environment. This anthology includes a range of styles and examples that reflect common experiences and phenomena; important

social issues and problems; the relationship between the individual and society; and a sociological perspective on specific historic events. The new Eleventh Edition includes several new readings that convey the best in critical contemporary sociology with an eye toward current social issues.

In the Brief, Fourth Edition of *Sociology: Exploring the Architecture of Everyday Life*, David Newman once again shows students how to see the “unfamiliar in the familiar”—to step back and see organization and predictability in their take-for-granted personal experiences. With his approachable writing style and lively personal anecdotes, the author’s goal from the first edition has been the same: to write a textbook that “reads like a real book.” He uses the metaphors of “architecture” and “construction,” to help students understand that society is not something that exists “out there,” independently of themselves; it is a human creation that is planned, maintained, or altered by individuals. Using vivid prose, current examples, and fresh data, this text presents a unique and thought-provoking overview of how society is constructed and experienced.

This brief anthology for introductory sociology is a collection of 24 short readings that illustrate key concepts in sociology, relate to the everyday lives of students, and spark good classroom discussions. The selections represent four theoretical traditions in sociology (functionalism, symbolic interaction, conflict theory, feminism) and show the range and diversity of

sociology and the people who practice it. The book is designed for instructors who want to expose students to some original scholarship in their first sociology course, but who do not want to adopt a comprehensive reader along with the core text they are using.

Drawing on sociological theories to assist understanding of how political power operates in the cultural sphere, *The Sociology of Architecture* frames the discipline as a field of symbolic and material conflict over social identities. This volume contests the notion of architecture as an apolitical endeavor and suggests that major architectural projects can act as tangible expressions of the ultimately contested nature of collective identities, thus shedding light on how those with power both legitimate and mark their position in the world.

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. Dr. Goffman uses the metaphor of theatrical performance as a framework. Each person in everyday social intercourse presents himself and his activity to others, attempts to guide and control the impressions they form of him, and employs certain techniques in order to sustain his performance, just as an actor presents a character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

This book uses in-depth interview data with victims of conflict in Northern Ireland, South Africa and Sri Lanka to offer a new, sociological conceptualization of everyday life peacebuilding. It argues that sociological ideas about the nature of everyday life complement and supplement the concept of everyday life peacebuilding recently theorized within International Relations Studies (IRS). It claims that IRS misunderstands the nature of everyday life by seeing it only as a particular space where mundane, routine and ordinary peacebuilding activities are accomplished. Sociology sees everyday life also as a mode of reasoning. By exploring victims' ways of thinking and understanding, this book argues that we can better locate their accomplishment of peacebuilding as an ordinary activity. The book is based on six years of empirical research in three different conflict zones and reports on a wealth of interview data to support its theoretical arguments. This data serves to give voice to victims who are otherwise neglected and marginalized in peace processes.

Covering a series of issues, this book seeks to reestablish sociology of the family as a key area in undergraduate studies. It provides a theoretical and scholarly overview of the area and includes various essays.
