In the history of TB, the turning point came in the 1930s and 40s. It was then that Waksman forged an alliance between American university research and an embryonic pharmaceutical industry to...

~~Spitting Blood: The History of Tuberculosis by Helen Bynum...~~

Spitting Blood begins with an account of George Orwell's life with and death from tuberculosis, illustrating the course of the disease just as effective antibiotic treatment was becoming available (he proved allergic to streptomycin). While it touches on many of the individual stories of both victims and scientists, however, it doesn't dramatise them: the focus remains on the medical and social history, situating tuberculosis in its historical and cultural contexts.

Tuberculosis is characterised as a social disease and few have been more inextricably linked with human history. There is evidence from the archaeological record that Mycobacterium tuberculosis and its human hosts have been together for a very long time. The very mention of tuberculosis brings to mind romantic images of great literary figures pouring out their souls in creative works as their ...

~~Spitting Blood: The history of tuberculosis – Helen Bynum...~~

Spitting is the act of forcibly ejecting saliva or other substances from the mouth. The act is often done to get rid of unwanted or foul-tasting substances in the mouth or to get rid of a large buildup of saliva. It is currently considered rude and a social taboo in many parts of the world including the West, while in some other parts of the world it is considered more socially acceptable.
