...

Staying Alive: Dialysis saves lives of kidney patients ... For most people, dialysis is a bridge to kidney transplant. While waiting for a kidney transplant, people are kept alive with dialysis. However, for some elderly or very sick people, kidney transplant may not be an option, and dialysis might be the only remaining alternative.

Transplant Survival Stories

This means that people can die while on dialysis if they do not have a kidney transplant, particularly elderly people and those with other health problems. Someone who starts dialysis in their late 20s can expect to live for up to 20 years or longer, but adults over 75 may only survive for 2 to 3 years.
