A comprehensive study guide offering in-depth explanation, essay, and test prep for selected works by Joseph Conrad. Polish-British writer known as one of the greatest novelists to write in the English language. As a master prose stylist of nineteenth and twentieth-century modernism, Conrad's works shaped and inspired English narrative fiction. Moreover, his novels' anti-heroic characters inspired many other authors. This Bright Notes Study Guide explores the context and history of Joseph Conrad's classic work, helping students to thoroughly explore the reasons they have stood the literary test of time. Each Bright Notes Study Guide contains: - Introductions to the Author and the Work - Character Summaries - Plot Guides - Section and Chapter Overviews - Test Essay and Study Q&As The Bright Notes Study Guide series offers an in-depth tour of more than 275 classic works of literature, exploring characters, critical commentary, historical background, plots, and themes. This set of study guides encourages readers to dig deeper in their understanding by including essay questions and answers as well as topics for further research.

North-Holland Mathematics Studies: Hewitt-Nachbin Spaces exposes the theory of Hewitt-Nachbin spaces, also called realcompact or Q-spaces, taking into account synergistic points of view from which these spaces are investigated. The publication first offers information on embedding in topological products and Hewitt-Nachbin spaces and convergence, including notation and terminology, embedding lemma, E-completely regular spaces, E-compact spaces, and characterizations and properties of Hewitt-Nachbin spaces. The text also touches on Hewitt-Nachbin spaces, uniformities, and related topological spaces, as well as Hewitt-Nachbin completeness and uniform spaces, review of uniform spaces, and almost realcompact and cb-spaces. The book takes a look at Hewitt-Nachbin completeness and continuous mappings. Discussions focus on classes of mappings, perfect mappings, WZ mappings, closed mappings and Hewitt-Nachbin spaces, and E-perfect mappings. The manuscript is a reliable reference for readers interested in Hewitt-Nachbin spaces.

Sir John Butterfill, Mr Stephen Byers, Ms Patricia Hewitt, Mr Geoff Hoon, Mr Richard Caborn and Mr Adam Ingram : Ninth report of session 2010-11, Vol. 2: Appendices, written and oral Evidence

The book begins by placing clinical guidelines within the context of the broader movement towards evidence based practice; it explores the concept of evidence, and defines clinical guidelines and care protocols. These are then examined in the clinical situation. The book goes on to discuss the relationship between them and the exercise of individual autonomy and expertise, and with individualised care and patient involvement and choice. The influence of cost on decision making is reviewed, and a chapter discusses the political aspects of care guidelines and protocols. Finally the book describes the implementation of guidelines and protocols and the barriers to implementation, and makes suggestions for the future.

This step-by-step guide takes the reader logically through the process of undertaking a literature review, from determining when this methodology might be useful, through to publishing the findings. It is designed particularly for students undertaking a dissertation using literature review methodology. However, it also caters to practitioners who wish to review the existing evidence in order to develop practice. Key features of the text include: a chapter on what makes a good literature review, so that readers are clear and confident about what they're aiming for; discussion of the value of literature reviews, whether for fulfilling the requirements of a course or for developing practice; a chapter structure that reflects the structure of a typical dissertation by literature review, making the material intuitive and easy to navigate; case examples throughout to illustrate how methodological principles work in practice; a troubleshooting guide to provide support and advice on common problems when carrying out a literature review; advice on the dissemination of findings. Written by an established author with significant experience teaching and supervising students doing literature reviews, this invaluable text offers systematic and insightful advice on all aspects of literature review methodology, from problem identification to synthesizing information to forming conclusions. It is ideal for any student or practitioner in health and social care looking to undertake a literature review for study or practice purposes.
