Sound the ball makes at impact. For many players this is more of a mental purpose than a physical purpose. Two common misconceptions with dampeners are that they help with tennis elbow problems and reduce a racquets power level.

## Why Do You Need A Vibration Dampener? | TENNIS EXPRESS BLOG

Dampeners do not help tennis elbow, change string tension, increase string durability, boost power, add spin or any of the other benefits you may have seen touted elsewhere. The reason this misconception has spread is due to manufacturers using terms in their marketing to make you think playing without a vibration dampener is leaving you open to all sorts of elbow problems.

## Tennis Racquet Vibration Dampeners - peRFect Tennis

To answer your question right off the bat, yes, tennis vibration dampeners can help with tennis elbow. If you 're not familiar, tennis elbow is when your elbow tendons are inflamed and painful. Usually this inflammation and pain is caused by strain or over use. It 's named ' tennis elbow ' because it 's often related to playing tennis, at least when it 's in this region of your arm.

## Vibration Dampeners: Do They Help With Tennis Elbow ...

Conclusion, while tennis racquet vibration dampeners come in many fun, colorful, and unique styles and designs, the only true, proven benefit, is that they dampen only the vibrations of the strings, and muffle the sound.

## Do Vibration Dampeners Work? – Racquet Inc

Despite this research, the myth of vibration dampeners reducing vibration and shock generated when hitting a tennis ball persists mainly due to how manufacturers market them. Speaking from personal experience, I agree with their primary finding that despite the fact they don 't increase comfort, they do a great job at muting the " ping " sound you hear when striking the ball.
