Ebro - Wikipedia

The Ebro has the greatest discharge of any Spanish river, and its drainage basin, at 33,000 square miles (85,500 square km), is the largest in Spain; the river drains about one-sixth of the country. Because it plunges through the coastal mountain ranges by a series of deep gorges and defiles, the Ebro is navigable upstream for only 15 miles (25 km), from its delta to the city of Tortosa .
